

Aesthetic Programming

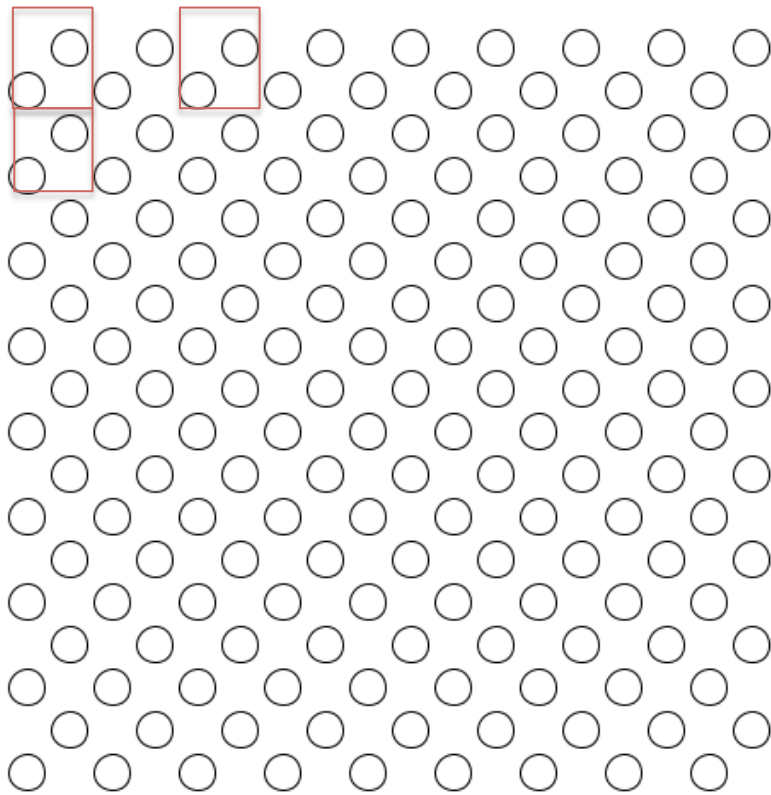

Class 07- Code and Generativity

<https://auap.github.io/AP2017/class07/sketch07/index.html>

Generativity:

- *Rules*
- *Repetition but with variation*
- *Emergence*

1. Draw a pair of ellipse
 - Two ellipses draw at the same time
 - The distance between the two is 25 pixels (both x and y)
2. Fill the screen with pairs of ellipse, the space between is 50 pixels
3. Ellipses will start at size 0 and increase by 0.01 every time
4. Condition: Until the size reaches 40, then ellipses' size will decrease by 0.01

Mini exercise6 walkthrough: A Generative Program

Discussion / Sharing on mini ex 5 – code and language:

- https://github.com/RikkeBadsberg/MiniEx/tree/gh-pages/MiniEx5_RiTa
- <https://github.com/GustneGustav/Rasmus-er-sej-og-flot/tree/master/Mini-ex5>
- <https://github.com/MagnusJMJ/APME/tree/master/miniex5>

More than an “aesthetic use of the written language”, the aesthetics of electronic literature is first and foremost aesthetics of materiality: materiality of the text, of the interface and of the medium.

Bouchardon, 2008

Mid Term Evaluation

- How much effort have you put into this course? Is it enough?
- How do you think about the mini exercises / course components and the overall learning environment?
- How do you think about the course Aesthetic Programming in general?
- How can we better use our peers?
