

Tjekliste

Har I downloadet P5.js-librariet?

Har I en GitHub bruger?

Har I en editor?

Programmering med P5.js

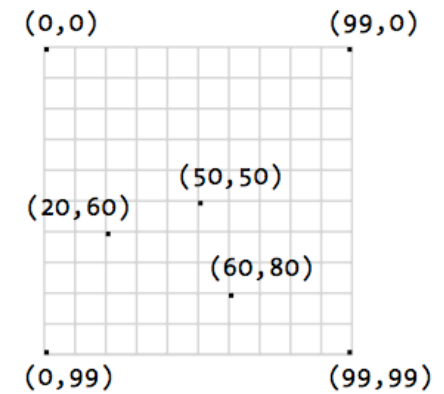

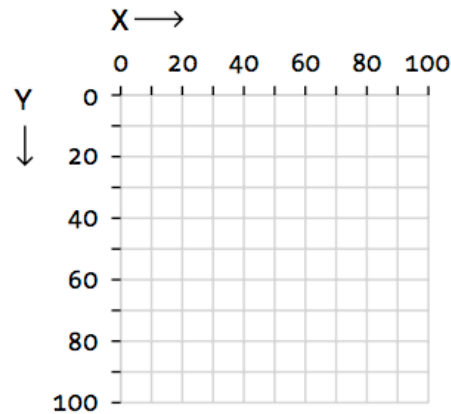

```
function setup() {  
}
```

```
function draw() {  
}
```

Programmering med P5.js

```
function setup() {  
  createCanvas(__,__);  
}
```

```
function draw() {  
}
```

Programmering med P5.js

```
function setup() {  
  console.log(____);  
  createCanvas(____,____);  
}
```

```
function draw() {  
}
```

Shapes!

```
line(x1,y1,x2,y2);  
ellipse(x,y,w,h);  
rect(x,y,w,h);  
m.fl.
```

Kig i reference 😊 : <https://p5js.org/reference/>

Kig f.eks. På: triangle(), ellipseMode(), strokeWeight()...

Colours!

Greyscale: et tal fra 0-255

RGB= rød, grøn, blå

P5.js:

```
background(__,[__],[__]);
```

```
fill(__,[__],[__]);
```

```
noFill();
```

```
stroke(__,[__],[__]);
```

```
noStroke();
```

Kig i reference 😊 : <https://p5js.org/reference/>

Kig f.eks. På: `colorMode()`

Winnie's sample code

[https://rawgit.com/AUAP/AP2017/master/class03/sket
ch02/index.html](https://rawgit.com/AUAP/AP2017/master/class03/sket
ch02/index.html)

Quick Task!!!

- Lav hurtigt et program med:
 - Baggrundsfarve
 - En streg fra A(200,350) til B(600,555) i en anden farve
 - 5 min!

noises/glitches/errors

Brainstorm

- Hvad tænker I?

GitHub

How the hell does this shit work?!

1# lav et "repository"

*NB! Når man navngiver sit program::

- Lille forbogstav
- Ingen mellemrum
- Stort forbogstav når der startes på et nyt ord istedet

Dit næste projekt

- Giv det navn* (f.eks. AP2017 el.lign.)
- Afkryds " Initialize this repository with a README"
- Rediger README

Upload files

- Træk din projektmappe ind og kald den "mini_ex(?)"

Lav en ny README

- Create new file
- Kald den "README.md"

2# Lav din README

Winnie skriver om readme:

- A screen shot about your program
- Describe your coding process
- What constitutes a program?
- What is error?

#3 Vedlæg et Screenshot

Upload et screenshot af programmet til din github projektmappe

- Kopier linket til billedet

Rediger jeres README

- ![ScreenShot]([link til jeres screenshot])

Run your program from GitHub

Kopier linket til jeres html fil for jeres projekt

Ret

<https://github.com/> → <https://rawgit.com/>

Dvs.

[https://rawgit.com/\[username\]/path/to/your/miniex/index.html](https://rawgit.com/[username]/path/to/your/miniex/index.html)

NB! Den kopierer evt. /blob/ -slet den del, så burde det virke

Indsæt linket i jeres browser

Peer-Feedback

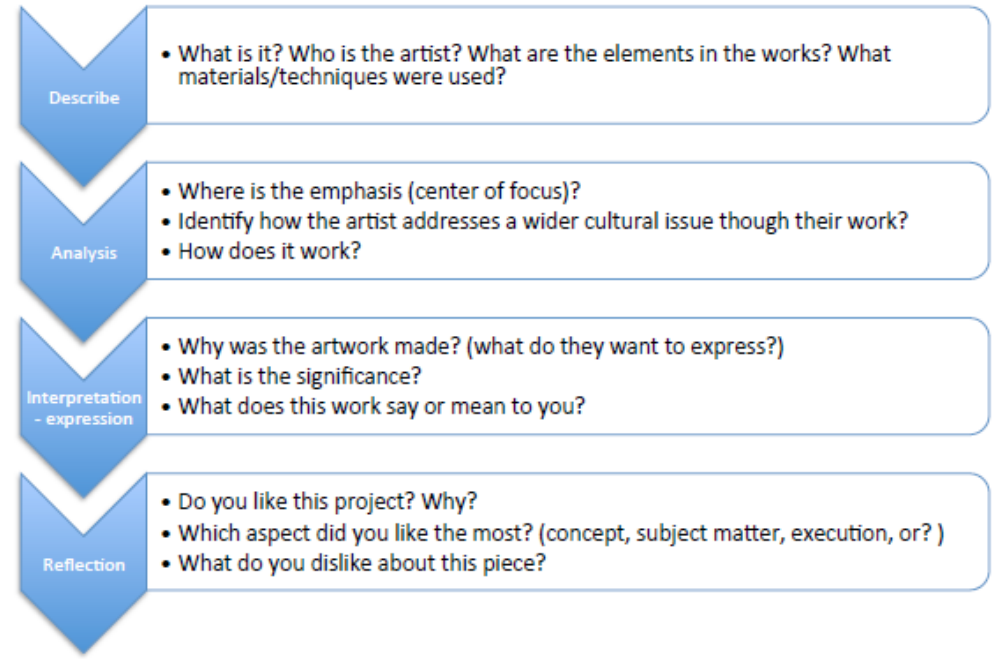

Feedback gives som "Issues"

Under fanebladet "Issues" lav "New issue"

- Kald dette Issue: "Feedback on mini_ex(?) by (YOUR FULL NAME)"

Skriv mere end: "I really like this" eller "Nice"

- Beskriv – Analyser – Fortolk – Reflekter

miniex — go nuts!

Husk peer-feedback til 2 andre
