Schedule

Exam schedule: 12-14 Jun 2017 (Mon to Wed)

- 30 mins preparation time
- 10 mins presentation (an on-site question + the assigned question)
- 10 mins discussion together
- 5 mins discussion within examiners
- 5 mins feedback on grade and exam

Exam

Exam schedule: 12-14 Jun 2017 (Mon to Wed)

Rundown:

1.   First of all you draw a hidden question on a specific programming term [e.g Can you discuss "object" within the realm of Aesthetic Programming in 5 mins? - this is just an example]

2.   You have 30 mins preparation time. [You will take the question and go to another room to prepare a short response.]

3.   For the first 5 mins max, you respond to the question above.

4.   You are then asked to make a short presentation (for a further 5 mins max.) based on this pre-assigned question: **"Draw a concrete technical example from your final project and discuss any one of the aspects of code that informs your reflection on digital culture."**

5.   10 mins discussion together (based on what you have presented).

Few notes as follow:

-     feel free to bring your computer/pen/notes/blank paper if you think they help your exam.
-     no live coding
-     Read again the course outline on the course expectation
